

AkaBI

Business Intelligence Consultant / Analyst

AkaBI is an international IT consultancy company specialized in Datawarehouse and Business Intelligence related topics. We are experts in Databases, ETL/ELT, Reporting, Metadata Management and Data Quality. We assist our clients with all their Digital Transformations by investing in our people. We're continuously bringing value to our customers for more than 5 years now, driven by two main objectives: quality and client's satisfaction.

We are established in Belgium as well as in Luxembourg. We focus mainly on quality and long term relationship, moreover we favour a participative management style. Our consultants are providing either a time and means consultancy or fixed-priced projects.

Why « AkaBI » ?

AKA is the acronym of « Also Known As ».

AKA means red in Japanese, which relates to challenge and passion, that's why we focus on quality and long-term relationships. BI has a double meaning (representing our 2 main activities), it is the acronym of Business Intelligence and Business Innovation. Our strategy can be summarized by:

- Becoming a BI reference company on the market
- Ensuring a healthy growth (no debt, no HR turnover)
- Staying focus on quality instead of quantity
- Ensuring the personal and professional development of everyone

As part of our solid growth plans, AkaBI is looking for Business Intelligence consultants to strengthen and expand our Belgian and Luxembourgish Business Intelligence teams.

Job description

- You will assist our customers in the functional studies, technical architecture, design and/or the development of Business Intelligence solutions.
- Depending on your experience and expectations, you help AkaBI to expand its activities and gain responsibilities (people management, sales/technical lead...).

Profile

- You have a Bachelor or Master degree
- You have previous experiences in using BI tools and Data Warehouse concepts (SAP BO, Oracle BI, Qlikview, Microstrategy, Microsoft BI, SAS, Informatica, Talend...)
- You have good analytical skills
- You have a very good knowledge of French and/or Dutch and English.
- You have good interpersonal skills

Offer

- A chance to work in challenging environments and projects
- Corporate culture and working conditions quality (Company awarded Great Place To Work 2017)
- Concrete evolution of your career (mission, internal functions...)
- Competitive salary with extra & direct benefits
